Dr. Levine's latest in-office whitening technique, GoSMILE pro-wrap, is a great way to keep your smile its whitest, using a quick, efficient, non-sensitive method. This procedure is designed to be coupled with your regular hygiene visit, every 3, 4 or 6 months, does not cause patient sensitivity, and has been proven to brighten teeth up to 8 shades, depending on your starting shade.

This proprietary technique is available only to our patients at GoSMILE Aesthetics!

The GoSMILE pro-wrap procedure combines some key factors needed for effective bleaching: temperature, active ingredients, contact time and a sealed environment. Instead of the industry standard 15 - 20 minutes "passes" (sessions under the whitening light), GoSMILE pro-wrap requires just 8 minutes, which can be repeated 2, 3, or 4 times, depending on how white you want to go!

At the end of your procedure, you will be provided with a complete at-home whitening kit to maintain the new lighter shade. This includes GoSMILE B1 Advanced whitening ampoules, GoSMILE Touch-up ampoules (available in 3 flavors), as well as GoSMILE AM and PM aromatherapy toothpaste.
